

AC-14 TYPE

**High Holding Power Stockless Bower Anchor
with Weight Reduction**

- Scientifically dimensioned.
- Maximum surface as regards of its weight.
- Strong.
- Greater reliability in soft mud, sand, sand/shingle and clay bottoms.
- If fits itself properly in ships of modern design.
- Holding pull is at least $2\frac{1}{2}$ to 3 times greater than other types of standard anchors of the same weight in practically all types of sea beds.
- Several Classification Societies allow up to 25 % weight reduction for commercial ships on the normal recommended weight of a standard anchor.
