

WINDOW DEFOGGING & DEFROSTING

K-3040

DEICING AND DEFOGGING ELECTRICALLY HEATED WINDOW

Installed on new commercial, Navy, Coast Guard vessels, as well as ships undergoing conversion. Kearfott Heated Windows are used year round under wide range of climate, weather and temperature conditions. The windows are completely assembled and ready for installation.

Electrical energy is supplied to conducting film through bus bars located at opposite edges of glass. Sufficient thermal energy is provided to maintain ice-free, frost-free, fog-free window. Heating is controlled by specially designed sensor controller that monitors the window temperature.

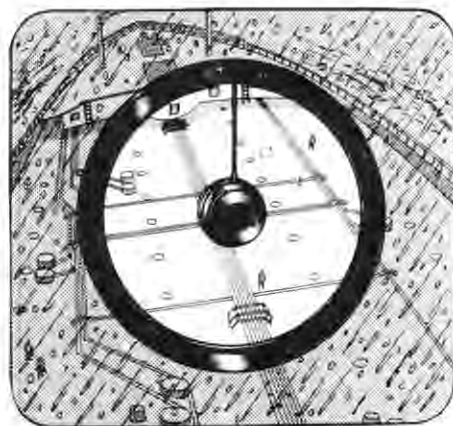

Voltage - 115 - 220 - 440 AC
Wattage - 75 to 350 Watts/sq. ft.
Mil. Spec. MIL-W-18445

K-3041

HINGED AND FIXED PORTS

- Bolt-on or Weld-in
- Sizes: 6" to 24"
- Covers and Insect Screens Available

K-3042 CLEAR VIEW SCREEN

- 12" or 14" Dia.
- Double Glazed
- Built-in Heater
- Solid Bronze Construction
- For Mounting in Glass Panel 3/8" Min. to 1/4" Max.
