CHOKER HOOK K-5070

No. 500J

U.S. Patent No. 2,828,156
Canadian Patent No. 578,621

This patented hook chokes tight—even on the smallest logs and on the small end of big logs—because of the distinctive, short design. Easy to carry, easy to hook and unhook, self-cleaning, more efficient on every score. The open sleeve helps to keep the ferrule from kicking out, any time the line goes slack. A favorite with chokermen! Cast of special, heat treated, high strength alloy steel.

HOOK NO.	500D	500B	500L	500J	500S
